

# RED LINE EXTRALIGHT 2.5WT SUSPENSION FLUID

- Popular in NASCAR's professional categories, motocross and road racing, where top engineers try to run the lightest fluid possible that maintains its viscosity and stability
- Many motocross tuners use it as a direct replacement in the front forks on Showa and Kayaba forks, with or without revalving
- Also used in road racing and circle track as a direct replacement for Penske's 2.5wt Silkolene® fluid

## TECHNICAL PROPERTIES

Vis @ 100°C, cSt	4.1
Vis @ 40°C, cSt	8.0
Viscosity Index	600
Pour Point, °C	-36
Pour Point, °F	-33

## PACKAGE SIZES:

- 91112 - ExtraLight 2.5wt Suspension Fluid - 16oz
- 91116 - ExtraLight 2.5wt Suspension Fluid - 5 gallon
- 91118 - ExtraLight 2.5wt Suspension Fluid - 55 gallon

## ABOUT RED LINE SUSPENSION FLUIDS

These products can be mixed together to create intermediate viscosities, customized for a dampener's particular characteristics.

- Superior shear stability over most popular shock oils
- Allows use of lower viscosities
- Far less shock fade, provides lower operating temps for same viscosity when compared to conventional fluids
- Eliminates most foaming and provides excellent seal lubricity
- All Red Line suspension fluids can be blended to create intermediate viscosities
- LikeWater® provides the least viscosity change of any suspension fluid on the market
- ExtraLight-2.5wt is very popular in NASCAR, as well as AMA Motocross
- LightWeight is often used in Sprint Car racing, as well as in CORR and SCORE Off Road competition
- Antiwear additives assist in longer shock life
